Instructions on how to use the “MEAxxx-Cutover” workbook.

The purpose of this workbook is to keep track of the status of the servers during the cutover.

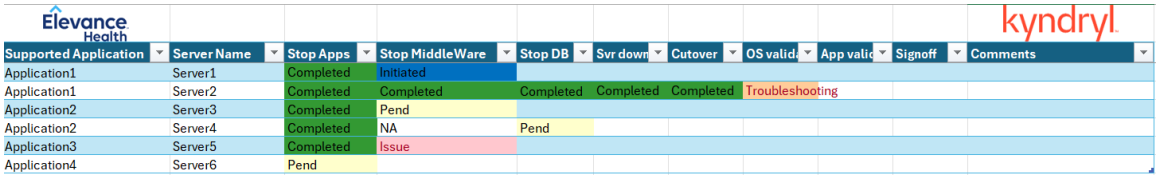

These are the different steps that a server can go through during cutover:

- Stop Apps
- Stop Middle Ware
- Stop DB
- Server down
- Cutover
- OS validation
- App validation
- Signoff

The status on each of the previous steps are:

- NA
- Pend
- Initiated
- Troubleshooting
- Issue
- Completed

The combination of Step / Status will allow the participants of the Command Center, in which stage it each server, for example:

Supported Application	Server Name	Stop Apps	Stop MiddleWare	Stop DB	Svr down	Cutover	OS valid	App valid	Signoff	Comments
Application1	Server1	Completed	Initiated							
Application1	Server2	Completed	Completed	Completed	Completed	Completed	Troubleshooting			
Application2	Server3	Completed	Pend							
Application2	Server4	Completed	NA	Pend						
Application3	Server5	Completed	Issue							
Application4	Server6	Pend
